

GUIDE

2023 Spring Releases

WHEAT

MATADOR WHEAT

LongReach LPB18-4160

FEATURES

- Matador is a new mid-maturity AH wheat variety with a medium grain size, improved shorter canopy and market leading yield.
- Well suited to planting in May, Matador thrives in large areas of SA and VIC showing good tillering and steadily building bulk over the season.

MARKETER

LEVERAGE WHEAT

FEATURES

- Replacement for EGA Gregory, Coolah and LRPB Flanker. Very high yielding in the early planting window.
- Good resistance to major diseases, yellow leaf spot resistance and physical grain quality characteristics.
- Mid-slow maturity, suited to late April/early May plantings.

MAX. GRAIN QUALITY CLASSIFICATION

VIC	S NSW
PENDING	APH

MARKETER

SUNDANCER WHEAT

FEATURES

- An ideal replacement for LRPB Lancer[®].
- Very high yielding, with excellent yield stability.
- Suits late April/early May plantings.
- Excellent rust resistance.
- Medium-short plant type with better straw strength than LRPB Lancer[®].

MAX. GRAIN QUALITY CLASSIFICATION

VIC	S NSW
PENDING	PENDING

MARKETER

TOMAHAWK CL PLUS WHEAT

FEATURES

- 'Scepter[®]' type Clearfield[®] variety with increased yields over Scepter[®].
- The highest yielding Clearfield[®] wheat variety across SA/VIC.
- Similar disease resistance profile, grain size and test weight as Scepter[®].
- Good sprouting tolerance, similar to Scepter[®].

MAX. GRAIN QUALITY CLASSIFICATION

VIC	SE NSW
APW	APW

MARKETER

GENIE WHEAT

FEATURES

- Mid-slow maturity, slightly later than RockStar[®], providing an excellent late April sowing option for medium-high yielding production environments.
- A long coleoptile - an advantage when sowing into marginal moisture conditions.
- Good pre-harvest sprouting tolerance with a provision rating of 5 based on internal testing, an improvement compared to RockStar[®].
- Useful stem rust (MRp) and stripe rust (MRMSp) resistances and offers good test weight.

LRPD Matador[®], LRPD Major[®], Leverage[®], Sundancer[®] and Tomahawk CL Plus[®]. *Genie TBC.

BARLEY

NEO BARLEY

Potential Malt

FEATURES

- A mid-spring maturing, IMI tolerant potential malting barley.
- An outstanding disease resistance package including excellent resistance to powdery mildew, cereal cyst nematode, scald and the spot form of net blotch and useful resistance to net form net blotch. NEOϕ is susceptible to leaf rust.
- A similar, semi-prostrate plant type to RGT Planetϕ.
- Good head retention and tolerance to lodging and head loss.
- Excellent grain plumpness, substantially superior to RGT Planetϕ, and comparable test weight to RGT Planetϕ.
- Tolerance to registered imidazolinone herbicides.
- A useful variety option where there are IMI residue concerns from previous season IMI herbicide applications.

MARKETER

LUPIN

LAWLER LUPIN

Narrowleaf Lupin

FEATURES

- A high yielding alternative to Mandelupϕ, Coyoteϕ and PBA Batemanϕ.
- Improved stem Phomopsis resistance over Coyoteϕ.
- Widely adapted throughout Eastern Australian lupin growing regions and Metribuzin tolerant.
- Similar maturity compared with Mandelupϕ, around 4 days quicker to flower than Coyoteϕ.
