PENDING/MALT

MARKETER

NEWTON

FEATURES

- Dual purpose variety with slow early development enabling early sowing for grazing, a long growing season, then harvest maturity equivalent to other long season cereals.
- Highly competitive plant type with high total biomass production and high grain yield potential (2-row feed quality).
- Very high tillering ability with particularly prostrate early growth.
- Winter habit that requires cold period to initiate head development.
- Maturity equivalent to medium developing winter wheat (in between EGA Wedgetail and DS Bennett).
- Tall plant type at maturity.

ABOUT US

SEED FOR
generations

Baker Seed Co. is a wholly Australian Family owned seed business based in Rutherglen, North East Victoria, which has been producing and processing seed for four generations.

Baker Seed Co. have a long standing tradition of providing sound advice to growers regarding new varieties, farming practices and latest technologies.

We continue this tradition through our team of highly dedicated and passionate staff with a range of seed knowledge and expertise.

Our team of professionals look forward to the day-to-day contact with our customers to help them find the varieties to suit their needs.
